

WCA_Agent::atCurrentWaypoint

WCA_Agent::finished

WCA_Agent::reachedCurrent
Waypoint

```
graph LR; A[WCA_Agent::atCurrentWaypoint] --> C[WCA_Agent::reachedCurrent Waypoint]; B[WCA_Agent::finished] --> C;
```

The diagram illustrates a state transition or event triggering mechanism. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'WCA_Agent::atCurrentWaypoint' and the bottom box contains 'WCA_Agent::finished'. On the right, there is a larger gray rectangular box with a black border containing the text 'WCA_Agent::reachedCurrent' on the top line and 'Waypoint' on the bottom line. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both conditions lead to the event in the gray box.
